- Creating responsive UI that work seamlessly across various devices and screen sizes.
- Experience with state management using React's built-in state and props.
- Familiarity with external state management libraries like Redux or Context API.

WORK EXPERIENCE:

FRONTEND DEVELOPER

Current Company:- Shadbox Infosystem Pvt Ltd Nagpur-Nov-2022 - Till date

- **Project Name-** FairFax-Egg-Donor Description - The app serves as a platform connecting egg donors and recipients anonymously. It facilitates various functionalities, including appointment registration with doctors, lodging complaints, providing feedback, and tracking the status of applications.
- **Responsibilities-** The development of an EggDonor platform using React.js. Implemented React.js in conjunction with Redux-Toolkit and Redux-Thunk middleware to effectively manage the project's state. Established a seamless connection between the frontend and backend by invoking APIs from the Redux store, showcasing a profound comprehension of Redux and its interaction with APIs. Employed Formik for streamlined form management, enhancing the user experience and ensuring accurate data collection and processing.
- **Technical Stack-** HTML, CSS, Java script, ReactJs, Redux
- **Project Name-** buildpulse.io Description - The platform that provides an end-to-end solution to detect flaky tests, give you metrics on productivity and stability, and track progress over time.
- **Responsibilities-** As a Front end Developer, my responsibilities encompassed transforming Figma design files into dynamic and visually appealing user interfaces using HTML and TailwindCSS. I played a pivotal role in creating and seamlessly integrating new features to enhance the overall user experience. Proficient in data visualization, I utilised libraries such as chart.js to represent statistics graphically, including graphs, pie charts, and percentages. Ensuring a seamless and accessible design, I prioritized responsiveness across various devices, contributing to an optimal and user-friendly interface.
- **Technical Stack-** HTML CSS, TailwindCSS, JavaScript, jQuery, ChartJs
